Qazi Abdul Mujeer

QA ENGINEER | SOFTWARE TESTER

Karachi, Pakistan | 0316-2454316 | abdul.mujeer98@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

SQA Engineer with over 2 years of professional experience in manual and API testing. Skilled in test case design, defect reporting, and functional, regression, smoke, sanity and exploratory testing, with hands-on experience in Postman, Playwright and SQL database validation. Familiar with SDLC/STLC, Agile/Scrum, Jira, and Git/GitHub. A software development background helps me find root causes faster, write clear and reproducible defect reports, and collaborate effectively with engineering teams.

TECHNICAL SKILLS

Manual Testing: Functional, Regression, Smoke, Sanity, Exploratory, Positive/Negative, UI, End-to-End, Basic Compatibility Testing

Test Design: Test Case Design, Test Scenario Creation, Requirements Analysis, Bug Reporting, Defect Life Cycle

Techniques (familiar with): Boundary Value Analysis, Equivalence Partitioning, Decision Table Testing, Error Guessing

API Testing: Postman, REST API testing, HTTP methods (GET, POST, PUT, PATCH, DELETE), status codes, JSON and request/response validation, basic negative testing

Database: Basic SQL (SELECT, WHERE, ORDER BY, GROUP BY, basic JOIN concepts), basic database validation

Automation (project practice): Playwright (API + UI test suites), Postman collections executed with Newman, SQL validation scripts, GitHub Actions CI runs and report artefacts

Tools: Jira, Postman, Playwright, Git/GitHub, Chrome/Browser DevTools

Process: SDLC, STLC, Agile/Scrum fundamentals

Programming: Python (basic), SQL (basic), JavaScript

PROFESSIONAL EXPERIENCE

SQA Engineer | Appearls

July 2025 – September 2026

- Designed and executed test cases to verify functionality and quality across the company's software products
- Identified, documented and reported defects with clear details so they could be reproduced and resolved
- Helped ensure the quality and reliability of software releases through consistent, structured testing

SQA Engineer | Cyphion

June 2024 – July 2025

- Created and executed test cases to verify application functionality, and validated fixes through retesting and regression checks
- Investigated and reported defects with clear reproduction steps, expected versus actual results and supporting evidence
- Tested web application workflows, including API request/response behavior and database validation, as part of the software development life cycle
- Worked closely with developers to clarify requirements, confirm fixes and support stable releases

QA & TECHNICAL PROJECTS

ShopSure — E-commerce Quality Assurance and Test Automation

GitHub | Case study

QA portfolio project (manual, API, UI and database testing)

- 101 manual test cases and 24 requirements with acceptance criteria; boundary-value, decision-table and negative design
- 202 automated checks: 72 API tests, 31 UI tests, 23 SQL validation checks and 76 Postman assertions
- Found and fixed 3 defects with documented reproduction steps, retest evidence and regression runs

PeopleCore — HRMS Workflow and Role-Based Access Testing

GitHub | Case study

QA portfolio project (workflows, permissions, database validation)

- 69 manual test cases covering employee, attendance and leave workflows across four roles
- 189 automated checks: 58 API tests, 20 UI tests, 12 SQL checks and 96 Postman assertions
- Tested a role/permission matrix including direct API access by under-privileged accounts; found and fixed 12 defects, including a critical missing authorization check on attendance creation

TaskFlow — REST API Quality Engineering and Regression Automation

GitHub | Case study

QA portfolio project (API-first testing, security and performance baseline)

- 67 manual API test cases: CRUD, schema and type validation, invalid payloads, pagination and filtering edges
- 134 automated checks: 48 API tests, 10 UI tests, 22 SQL checks and 50 Postman assertions, plus a local performance baseline
- Object-level permission and cross-project isolation testing; found and fixed 6 defects

Crypto AI Bot

University Final Year Project — Kohat University of Science & Technology (KUST)

- Built Crypto AI Bot as my Bachelor's Final Year Project: a software application integrating external APIs and handling application data
- Debugged issues and validated application behaviour across different scenarios
- Worked across frontend/backend interaction to understand how components exchange data

EDUCATION

Bachelor of Science in Computer Science | Kohat University of Science & Technology (KUST), Pakistan

2020 – 2024

CGPA: 3.62 / 4.00

CERTIFICATIONS & TRAINING

QA — Manual, Automation & Mobile Automation (Udemy, Lucky Trainings)

In Progress

Online course covering manual testing, test automation, and mobile automation testing
